Rossett School
Success for everyone

Welcome to
the Social and Computer Science Faculty

❖ **Please introduce yourself**
   My name is Miss Warburton and I am the Director of Studies for Social and Computer Sciences. I previously worked in industry for 14 years, working for two FTSE 100 companies.

❖ **How long have you worked at Rossett?**
   I have worked at Rossett School as a Computer Science teacher for five years.

❖ **Describe your faculty in three words**
   Willingness to learn.

❖ **What makes your faculty an exciting place to learn?**
   We continually grow through new teaching activities, embedding the latest research within our lessons. We enhance and adapt our teaching and learning in order to achieve increased student interest and greater success.

❖ **How do you support your students to achieve their best?**
   Throughout the subjects within this faculty we set high expectations, we encourage students to constantly challenge themselves and we make all our lessons engaging.

❖ **What is the first topic students' study when they arrive?**
   In Computing at KS3 the first topic is 'Using the Computer Effectively' this topic teaches students to become familiar with using a computer, school network and using Microsoft office packages to present their work and general ICT skills. Business Studies and Economics are optional subjects and taken in Years 10 to 13. The first topic taught is about entrepreneurs and having that first spark of an idea to set up a business.
   Sociology and Psychology study aspects of human behaviour that involve the individual's relationship to other people, groups and society, including cultural influences on behaviour.

❖ **What amazing things have your students gone on to do after leaving Rossett?**
   Students have gone onto study all subjects from this faculty at universities all around the UK and globally! We are a faculty that can lead you into a number of varied careers. Maybe one day they'll be setting up the next Apple or Microsoft, developing the latest artificial intelligent machine or using their psychology skills to help solve crimes.
